

ALARM SYSTEMS

A good alarm system should be an integral part of an effective security plan in both commercial and residential properties. Intruders are increasingly targeting properties with basic alarms (simple sensors and a bell-box), knowing they can be in and out in less than 40 seconds and thus ensuring it is very unlikely that anyone will respond within that timeframe.

CAPABILITY OVERVIEW

Westacre provides a global alarm installation capability, based around the core capabilities listed below. Whether part of a solutions package, or a single requirement, we liaise closely with each client to provide a truly bespoke service. Our alarm systems utilise state of the art equipment and revolutionary concepts to provide sophisticated systems, which can suit a wide range of budgets.

- ◆ Commercial and residential solutions
- ◆ Local access via keypad, proximity token, biometrics
- ◆ Remote access via smartphone or PC
- ◆ Auto-dial alerts via text, call, email, app
- ◆ Sensors - motion, vibration, pressure, PIR, door/window contact, anti-tamper, glass break
- ◆ Detectors - fire, smoke, heat, carbon monoxide, flood
- ◆ Remote fobs and panic alarms
- ◆ 24/7 alarm monitoring and key-holding, police response
- ◆ Smart home integration
- ◆ Qualified Electricians
- ◆ Existing system upgrades and repair
- ◆ Smoke screen systems
- ◆ Intruder DNA marking
- ◆ Valuable item DNA marking
- ◆ Lone-worker and vulnerable person
- ◆ Maintenance and testing
- ◆ Fully wireless systems
- ◆ CCTV system integration
- ◆ Access Control integration

Much like car alarms, house alarms have become an inconvenience to our hectic lifestyles, with bell boxes ringing for an eternity without so much as a glance from neighbours or passers-by.

Alarms have come a long way since Augustus Russell Pope, an American inventor, first patented his electromagnetic alarm system in 1853. Modern day smart alarms allow users to control their system from a smartphone when away from the property, allowing you to set/unset, alter zones, silence false alarms and view real time information.

A good, modern alarm system is a effective deterrent against burglars - they know what they are looking for and are more likely to target a property with what looks like an old and basic alarm system.

A good alarm system can help reduce insurance premium costs or increase the chances of an insurer 'paying-out' following a claim. Some insurers are going further by insisting on alarms being installed and remotely monitored where high value items are insured.

WESTACRE

Security

Get in touch for free advice and quotations. Our specialist Alarm Engineers provide a highly professional service, carrying out the survey, installation and maintenance of a wide range of intruder Alarm Systems.
